

PECFA number: 54451-1519-39
BRRTS number: 03-61-000591
Site Owner: Ms. Winnie Rudolph
Site Name: Roy's Mobil
Site Address: 139 8th Street, Medford Wi 54451

Program contact: Dee Zoellner, Site Review Hydrogeologist
Program contact address: 2129 Jackson St., Oshkosh WI 54901
Program contact phone: 920-424-0046

Submitted Questions and Responses

1. If the consultant deemed that an extension or addition to the SVE system would allow closure to be achieved in a shorter time frame (thereby showing a net savings in overall project costs), and these costs were included in the winning bid, would these modifications be PECFA eligible? **Yes**
2. How much PECFA fund has been used for investigation and remediation at this site? **Unknown**

If the cost exceeds the million dollar cap, will the State provide additional cost? **No**
3. What is the hydraulic conductivity at the site? **1×10^{-2} cm/s as stated in the O & M report dated May 1999.**
4. Free product was documented in three soil borings. Was free product removed and disposed of from the site? **Soil borings 4 and 6(repeated) have SVE/Groundwater wells at these 2 locations so yes, free product is being removed.**
5. Contaminant mass needs to be determined for this site. Will the closure be related to mass reduction? **Yes. Free Product is a reduction in mass. Closure should be based on eliminating free product and observing a stable or receding dissolved contaminant groundwater plume.**
